## The small-sized general cleaning machine for continuous use

The Primaster Easy Wash offers all the functions of a traditional floor-maintenance machine in a small size. It is suited well for small to medium sized spaces and stairwells as a general floor-maintenance machine.

The working capacity of the machine has been measured to correspond with that of larger floor-maintenance machines with the pad pressure focusing on a smaller area. The light weight (only 8kg) combined with the powerful motor makes the Primaster Easy Wash an efficient tool for daily cleaning needs.

The pads and brushes are available in numerous different sizes, coarsenesses, and shapes to ensure a first-class cleaning result.

The Primaster Easy Wash is equipped with a heavy-duty handle that allows the machine to be moved easily between different workspaces and floors. It also allows the machine to be transported easily between buildings.

### Accessories:

Nylon Brush

Tynex Brush

Pads

Solution Dispencer
