The Solution to ALL of Your
Cleaning Needs

Primaster

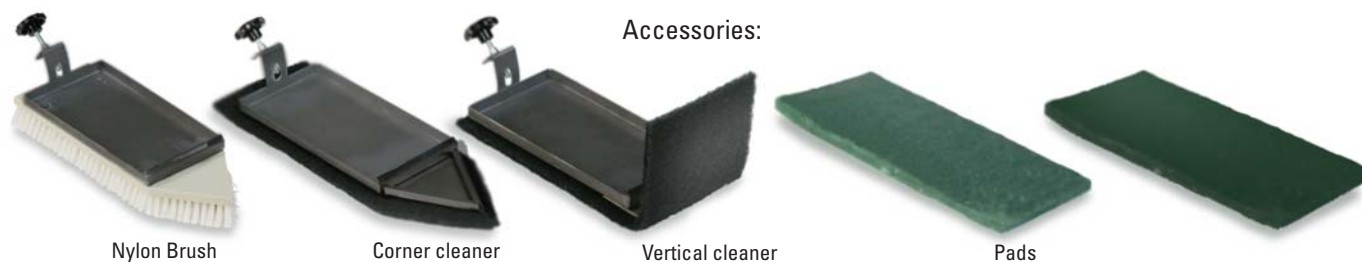

Primaster **TopLight**

The Solution to ALL of Your Cleaning Needs

The Primaster Top Light performs best in restricted areas, where other cleaning machines are too heavy and cumbersome. The Primaster Top Light cleans with efficiency. Its unique rapid back and forth-movement (5400 rpm) does not need a heavy tool. The TopLight is easy to maneuver in restricted areas and keeps its efficiency in open stairs, because the machine does not splash even if there is plenty of washing water on the floor. The Primaster Top Light is the first cleaning machine, which also cleans corners. The shape and size of the drive plate are specially suited for stairs and corners (rectangle, size 110 x 225 mm). The handle and the shaft are mounted with "floating installation", so the user can exactly adjust an ergonomic and comfortable working position in all kinds of stairs. The TopLight weight- only 8 kg - makes the moving the machine from stair to stair easier and speeds up working time considerably.

**Typical cleaning applications: Ground cleaning • Light cleaning
floors • stairs and steps • restrooms and toilets • washrooms • saunas • other restricted/obstructed**

Technical details:

Machine is CE-approved • Total weight 8 kg • 6000 r/min • 200 W / 230 V • Driveboard 110x215 mm • Pad 110x 215
